yunucms 1.0.7 has xss vulnerability in news center page title parameter#

in login with admin and visit http://localhost/index.php/admin/content/addcontent/cid/38 to add a new content.

in new content set content title to <svg/onload=alert(0)>, and save it.

there is a alert box in newscenter content list.

then visite page http://localhost/index.php/index/show/index?id=38 there is xss vulnerability.
